ACKNOWLEDGEMENTS

It is our foremost duty to express our deep sense of gratitude and respect to the guide Mr. M. A. Patil sir for his uplifting tendency and inspiring us for taking up this project work successful.

We are also grateful to Dr. A. C. Adamuthe (Head of Department, Information Technology) sir for providing all necessary facilities to carry out the project work and whose encouraging part has been a perpetual source of information.

We are highly indebted to Dr. Mrs. S. S. Kulkarni madam for her guidance and constant supervision as well as for providing necessary information regarding the project and also for their support in completing the project.

We also thank all staff members of our Department for their timely help and encouragement, which help us in completing of our project work.

We are indebted to the library personnel's for offering all the help in completing the project work.

Last but not only the least we are thankful to our family members for mental support and those helped us directly or indirectly throughout this project work.

ABSTRACT

The main goal of this project is to automate the process carried out in the business with improved performance. The working of the project is as follows: The first page provides several links. The Home page contains information about the daily collection amount, Date, Excel Download link for each module. The login provision on this page helps the already registered user to directly access the site. The easy recharge module contains information about easy recharge, SIM information, SIM services, payment bank. The FSE distributor module contains data about all old distributors like his/her name, id, and overall balance and payments. Bank distributors module contains FSE collection, SIM card collection, additional amount, and overall remaining balance. Bank details contain bank name and bank transactions. The existing business application uses a relational database so it is not a client for storing large amounts of data. And also, it is unable to access data remotely. So, the solution to this problem we provided is 000webhost database. We have developed a user-friendly web application for users which is easy to use for them and they can change according to their requirements in the future. Our team has helped clients to take their business to the next level with the help of custom-made solutions. Using this application, the user can store data related to their business and can store it into an online database so it cannot get affected due to any hardware related problem.

Contents

1	Introduction	1
2	Problem Life Cycle	2
2.1	Problem Identification	2
2.2	Problem Selection	2
2.3	Problem Definition	2
2.4	Problem Analysis.....	3
2.4.1	Fishbone Diagram.....	3
2.5	End Users	3
3	Literature Survey and Motivation	4
4	Proposed System and Requirement Specification	7
4.1	Proposed Solution.....	7
4.2	Software Requirements Specification	7
4.3	Significance of Project	9
4.4	Scope of Project.....	9
4.5	Deployment requirement	9
4.5.1	Software Requirement	9
4.5.2	Hardware Requirement.....	9
4.6	Project cost estimation	9
5	Design	10
5.1	Architecture	10
5.2	Process Flow	11
5.3	Data Flow Diagram	12
5.3.1	DFD Level 0.....	12
5.3.2	DFD Level 1.....	13

5.3.3	DFD Level 2.....	14
5.4	UML Diagram.....	15
5.5	Database Diagram.....	16
6	Development/Implementation Details	17
6.1	Technology Implementation	17
6.2	Implementation Tools.....	19
7	Testing	20
7.1	Test Case Table.....	21
8	Deployment	23
8.1	Readme File.....	23
8.2	User Manual	23
8.2.1	Welcome page module	23
8.2.2	Easy recharge module	25
8.2.3	FSE distributors	28
8.2.4	Bank distributors.....	30
9	Conclusion and Future Work	33
10	References	34
